THE G&G RATIONALE

The **elderly people have been not exposed to new technologies at school nor in their working years.**

Now they found themselves in a condition of **“digital illiteracy”** restraining them from a full access to the new services allowed by the digital technology.

The **elderly people usually consider computers and technology with fear, thinking of them as complicated and difficult.**

they need a **friendly, simple, non competitive, free of charge approach.**

WHAT ARE WE WORKING FOR?

ADULT DIGITAL LITERACY IMPROVEMENT TO PROMOTE AND FACILITATE ACTIVE CITIZENSHIP

Project's dream is to foster a process of **local stakeholders involvement** in supporting low cost training activities aimed to develop the adult's digital literacy levels **thus allowing elderly people to gain full citizenship in the digital society.**

ACTIVATION OF A TRAINING SETTING TO ENCOURAGE INTER-GENERATIONAL DIALOGUE

The involvement of secondary upper school, VET and university students in the role of volunteer “digital educators” make of this ICT learning approach a tool to **foster encounters between generations.**

LINGUISTIC DIVERSITY AND SPECIFIC CONTENTS TO ADDRESS LOCAL CULTURE ISSUES

The project respects Europe's linguistic diversity, with output in several languages it addresses cultural issues and takes into account the characteristics of the elderly population and the on-line services available in each country **developing specific local contents.**

HOW THE G&G IDEA WORKS?

A tutor trains the grandchildren

In each partner school of the G&G initiative, groups of volunteer students adhere to the project, thus taking the part of “grandchildren”. They are trained by a tutor, who will assist them also in their work with the “grandparents”, concerning the adult training methods and the ICT contents to be taught.

Each grandchild trains a grandparent

In each partner school of the initiative, an ICT laboratory connected with internet is available in the laboratory each grandchild teaches one grandparent:

- » how to access and browse the internet
- » how to use e-mail to communicate on-line
- » how to access local on-line services available on internet.

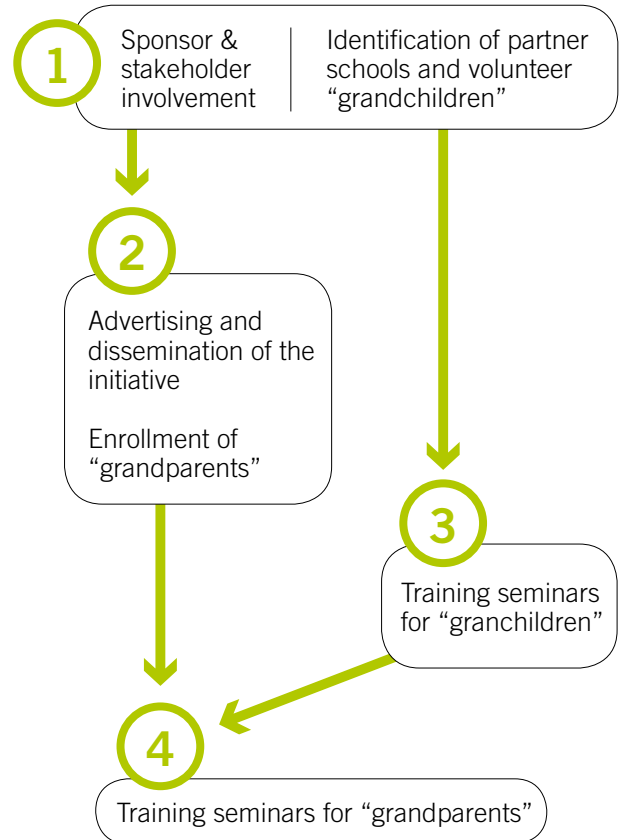

The grandparent practices supported by a tutor in a laboratory

In each partner school in the G&G initiative, a laboratory is made available, for free, for further practice by the grandparents. The grandparents have access to the on-line training resources made available on the G&G multilingual website and by each partner locally.

HOW THE G&G PROGRAM WORKS?

PROJECT OUTCOMES

Documents available in Croatian, Dutch, English, Estonian, Finnish, French, German, Greek, Italian, Latvian, Polish, Portuguese, Russian, Slovak, Slovenian, Spanish, Swedish.

GRANDPARENTS' HANDBOOK

A simple guide to the internet and e-mail, with references to the G&G on-line gym exercises and local content integration.

GRANDCHILDREN'S HANDBOOK

A quick methodological and content guide for the young teachers.

TUTOR'S HANDBOOK

A quick guide for the tutor assisting the grandchildren.

G&G MULTILINGUAL WEBSITE

Multilingual environment, with project description and G&G virtual community, the website backend allows all the partners to update, change and add content on their own, working on-line.

G&G ON-LINE GYM

A Gymnasium of on-line lessons, no login or access permission required. The lessons are specifically developed for a very basic learning about the following subjects:

- › **unit A** Internet browsing (7 gym lessons)
- › **unit B** Internet searching (3 gym lessons)
- › **unit C** e-mail messaging (7 gym lessons)
- › **unit D** web processing & social networking (5 gym lessons)
